GUO

Products Advantages

Impervious to Weather changes

Our revolutionary material and padding makes weather change no longer a problem. People can play our flute in the rain or in the cold of winter. This is the ideal flute for marching bands or any other outside ensemble.

Light weight

Light weight

Its light weight will be welcomed by some flutists and may reduce the risk of injury in flute performance. In one case it has helped an injured flutist, Mark Dannenbring, to regain total facility and return to the concert stage.

Colorful

Colorful Flute

You can literally own a “Colorful flute”, The New Voice flutes come in different colors. You can personalize your performance.

Environmental Friendly

In traditional flute making, high-pollution processes like soldering, polishing and electroplating are necessary. Our flute making successfully avoids these processes. We can proudly say that our flutes are truly low-pollution green products.

services

Flute Maintenance

The material is highly resistant to abrasion and will retain its pleasing appearance without worry. The new padding and mechanism will reduce the need for repair.

*You have to have crazy ideas to invent something sensible.
The next reliable way of predicting the future is to invent it.*
